

Expeditionary Mobile Water Packaging System

EMWPS
Delivers Water Pouches

The Expeditionary Mobile Water Packaging System (EMWPS)

- Individually packaged water on-site
- Reduced logistics and operating costs
- Contained within a modified 20' x 8' x 8' ISO container,
- Easily transported
- Self-sustaining generator

In one operation, the EMWPS will fill, cap, and label, while maintaining a sterile environment. The EMWPS is designed to be used in conjunction with one of Parker's mobile RO water purification systems.

Expeditionary Mobile Water Packaging System (EMWPS)

Key Features:

- Fully expeditionary: designed to be transported by air, land, or sea.
- Fully deployable: designed for easy setup and tear down. It has one expandable side that drops down for more operator room and is equipped with an awning that adds protection to the operator from extreme climates.
- Reduced costs: significantly reduces the need for water transports and does not require the power consumption requirements to manufacture bottles onsite.

ENGINEERING YOUR SUCCESS.

Expeditionary Mobile Water Packaging System (EMWPS)

Standard Features:

- **Sanitary environment:** piping meets 3A sanitary requirements and compressed air lines are filtered with a 3-stage sterile air filter.
- **Climate control:** fully functional HVAC unit for heating and cooling.
- **Water filtration:** carbon and micron filters ensure any remnants are removed from the potable water source.
- **Sterilization:** UV lights sterilize the pouches and caps.

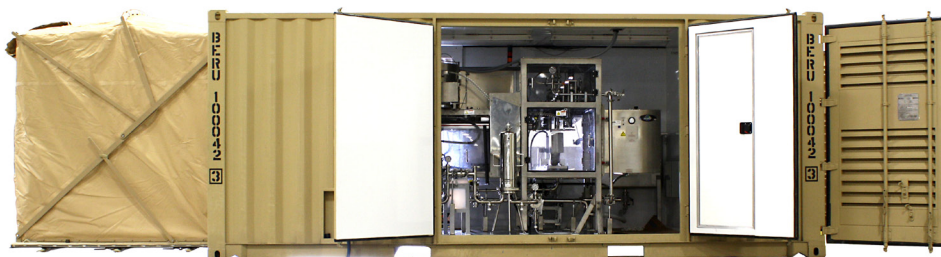

Water pouch as shown

- See LB-20 product bulletin #VMT0006

Specifications:

Output	1200 pouches per hour
Pouch Size	1 liter / 34 ounces
Power Requirement	120-240 VAC, 1 Phase, 60 Amps
Size	2.44 m x 2.44 m x 6.10 m / 8 ft x 8 ft x 20 ft
Weight	8165 kg / 18,000 lbs (approximately)
