Subject: Installation of the fresh water flush prior to the booster pump

Details:

Effective 02/09/2017 Parker W.P. engineering has made the following changes:

- Sea Recovery and Horizon Reverse osmosis has released another option to install the fresh water flush prior to the booster pump.

The Change effects the following model numbers:

- Aqua matic Compact & Modular
- Aqua Whisper DX Compact & Modular
- Aqua Whisper Mini Compact & Modular
- Aqua matic XL Compact & Modular
- Seafari Versatile Compact & Modular
- Seafari Mini Compact & Modular

The reason for the change is performance based. The purpose of the change is to help in priming the system during commissioning. Also, to flush the booster pump.

Note:
This document is to raise awareness of the change. Please use common sense when applying these instructions and base your decision case by case, these parts may look different in real case.
