

Membrane Water Purification

ENGINEERING YOUR SUCCESS.

ZL Series - Brackish Water RO Desalination

OUTPUT: Unit capacities from 100 to 1000 gpd. Multiple units can be combined in parallel for larger capacity systems and for reliability.

Applications:

Parker ZL series desalination systems provide permeate water typically from tap/city water or similar wellwater. ZL systems are used for bottled water, drinking water, food and beverage manufacturing, automotive, laboratories, healthcare, water stores, and residential/light commercial applications.
